##	Various temp names	n/a	Seq	rw				

ACAS File usage Table

rw = Read/Write   IS   = Indexed sequential
r   = Read only   IS 3i = Indexed Sequential but with 3 keys
w = Write only   Seq = Sequential
                          Rel   = Relative

Unless otherwise indicated all files have an extension of ".dat"
Other files exist during General Ledger running but all with extension ",tmp"
The other systems use temp file ending .dat and are not deleted others with .wrk are deleted at end.
All temporary files tend to be small but not greater in size than any primary files.
All RDBMS table names end with '-REC' and are all upper-case.
The invoice tables have secondary tables that are linked but not listed above.
